

HYDREX™ 6000

Chemical Water Treatment

Decontamination of industrial sewage is a challenge faced every day by managers of treatment plants: balancing regulatory obligations in terms of discharge standards and economic constraints with operation requires extensive experience and know-how.

Veolia Water Technologies helps all industries in all sectors from diagnosis through to the selection of appropriate Hydrex™ solutions.

Features & Benefits

- Wide range of chemicals for wastewater treatment (industrial and municipal):
 - Coagulants:
 - > Organic, inorganic, blends;
 - Flocculants:
 - > Anionic, cationic, amphoteric, non ionic;
 - > Solid form (Powder, beads, tablets);
 - > Liquid form (Emulsions, water dispersions);
 - Heavy metal insolubilizers and precipitants;
 - Antifoams;
 - Odour control;
 - Micro- and macronutrients
- Coagulants and polymers that effectively enhance sedimentation and improve performances
- Products that optimize the operations
- Products based on renewable resources
- Development of green products, environmentally friendly
- Carbon footprint of Hydrex™ products have been calculated

Applications

State-of-the-art clarification and wastewater chemistry

- Industrial wastewater
- Municipal wastewater

Related Services

Local after-sales service and support teams offer preventative and corrective maintenance programs to ensure the long-term, efficient operation of installed plant.
